

# EPOXY CLEANER

An Ultra Low Disturbance  
Building Solution

Property Repair Systems  
01626 331351

## Introduction

EPOXY CLEANER is a liquid designed to remove un-cured epoxy resins from surfaces and tools.

EPOXY CLEANER can also be used as a smoothing agent for fine finishing of epoxy surfaces by wiping it across the tool face.

## Special features

- Non flammable
- No odour
- Cleans tools
- Cleans surfaces
- Removes A and B parts
- Contains no solvent or water

## DESCRIPTION

EPOXY CLEANER is a clear one part liquid designed to remove un-cured epoxy resin, both mixed and un-mixed parts. It does not contain solvent or water, so can be applied to difficult substrates. Surfaces covered with epoxy wood fillers and concrete repair mortars can be smoothed by using the Cleaner fluid on the tool face.

## TECHNICAL DATA

### Active Substance/Other

Mixture of Esters

### Uses

Removes un-cured mixed and individual Part A and Part B Epoxy resin components.

### Classification/Aggressivity

Irritant/None known

### Size and Coverage

250cc will clean a maximum area of 2.5 square metres on a smooth surface.

## USES

For removing Epoxy in its un-cured state from surfaces and tools. For removing mixed epoxies, Part A and Part B epoxy components from tools and surfaces.

## PREPARATION & METHOD

Wear vinyl disposable gloves and disposable coveralls.

Avoid epoxy splash or contact with skin and eyes.

Apply the EPOXY CLEANER by brush, spray or cloth to the surfaces to be cleaned.

Do not apply to skin or eyes.

NOTE – will NOT remove hardened or cured epoxy resins.
